Dear Homeowners,

The Board of Directors has clarified the landscaping policy.

Owner-generated landscape debris which requires the claw on Saturday and Sunday can be placed at the curb completely off the road after 5:00 p.m. on Sunday. Residents must call Waste Management on Monday to schedule the actual pick-up of the debris.

Any landscape debris generated during the week may be placed at the curb completely off the road after 5:00 p.m. on Tuesday or Wednesday before 7:00 a.m.

Landscape debris should not be placed at the curb completely off the road on Monday, Thursday, Friday, or Saturday.

Commercial providers should remove self-generated debris. A request from the customer is typically all that is necessary.

Do not leave landscape debris at the curb prior to a storm watch or warning. Waste Management will not schedule an extra delivery.

Residents must call Waste Management at 546-7700 for the “claw” as necessary. Waste Management requires all landscaping to be cut into three foot sections and the debris volume can not exceed the size of three refrigerators placed side by side. Waste Management has ten days from the date of the phone call to pick up the debris. Waste Management will not schedule extra pick-ups prior to a storm watch or warning.
